

# DrenchLact

A drenching solution dedicated to supporting dairy cows suffering from infection or endotoxemic shock

## Drench Lact :

Specifically designed to support a good recovery.

Rehydration -  
restoration  
of the blood  
volume

Compensation  
of minerals  
deficits

Energetic  
supplies

Intakes supporting  
the animal's  
defence  
mechanisms

DrenchLact is recommended :

- To support cows suffering from infection
- To support cows in cases of endotoxemic shock
